

ACCOUNTABILITY WITH CONSTANT AND CONSISTENT PROTECTION

A Preventative and ProActive Approach To IT Services and Support

Cybercrime

is the greatest threat to every company in the world... Every 40 Seconds At Least One Business Falls Prey To Ransomware!

The TRS Hybrid Managed Services Offering helps businesses best protect their IT networks and improve operational efficiencies by providing the following major Managed Services benefits:

Enhanced Cyber-Security Protection

TRS's CORE6+ and BASE4+ Business Network Security platforms deliver an enhanced and multi-layered approach to Cyber-Security Protection. With daily updates, our platform provides the most up-to-date protection, helping to mitigate and eliminate the vast majority of today's (and tomorrow's) cyber-threats to your business.

Prevent Expensive Downtimes

Cyber-attacks can certainly take down systems, which is why we use the multi-layered approach described above... BUT...

Knowing that most downtime is associated with equipment failure - like server and/or computer malfunctions or hard-drive issues - TRS Security platforms include automated device monitoring and reporting to alert us to issues that we can remedy before they actually become problems.

ProActive Monitoring and Remote Issue Fixing

With automated daily and real-time reporting, TRS can stay abreast of any issues or concerns that may be affecting any "managed" device on your network.

With this ProActive Monitoring and our Remote Access and Management Tool, we can catch issues before they escalate and respond quickly to ensure business continuity, and minimal (if any) down time.

Increase Productivity and Efficiency

When you use a non-IT staff member to work on your computer issues, not only is that individual neglecting their own job, causing a loss in their productivity, but they will often get side-tracked, and/or overrun, with miscellaneous requests from other co-workers, taking them further away from their own responsibilities.

By relying on TRS's experienced Technicians to work on your company's IT-related issues, you're actually allowing your staff to be more productive by focusing on their own job roles, responsibilities and tasks.

Control the Cost of IT Support

With TRS, you only EVER pay for the services you're actually getting. When you move forward with the TRS Hybrid Managed Services offering, you are getting the most cost-effective managed services offering available.

The small monthly platform fees are easy to budget for, and with the DIY and/or Co-Managed Technical Support options, you are guaranteed the ability to control your costs & only pay for the service you get.

We Never Over-Charge and We Never Over-Profit!

12 Benefits of TRS's Managed Services
