

VPN AND SECURITY NEXT-GENERATION FIREWALL (NGFW)

Comprehensive Gateway Security For Today's Cyber-Threats!

Get Enterprise-Grade Gateway Protection from Intrusion, Malware and Ransomware Without the Enterprise Cost.

In today's world of ever-evolving network security threats and the growing sophistication of cyber-attacks, small businesses face large challenges when it comes to defending their networks, their data and their reputation.

Keeping up with the continual changes in threat management and network security protection can be an impossible task, if left to a human element.

Introducing the SonicWall TZ350 Enterprise-Grade Security Appliance with Comprehensive Gateway Security and Integrated Threat Prevention.

This Comprehensive Gateway Security solution includes advanced Intrusion Prevention Services, Application Intelligence Control, Content Filtering, ICSA-Certified Gateway Anti-Virus/Anti-Spyware Protection, as well as Deep-Packet Inspection.

The SonicWall TZ350 Security Appliance provides a Unified Security Solution at a Low Total Cost of Ownership (TCO).

Flexible, Integrated Security Solution

SonicOS, which is SonicWall's feature-rich operating system, includes a powerful set of capabilities providing organizations with the flexibility to tune these Unified Threat Management (UTM) firewalls to their own specific network requirements, creating a customized Security Solution.

Stop Known Threats and Attacks with the SonicWall Integrated Security Suite.

Superior Threat Prevention

Securing your business network in today's always-changing cyber threat landscape is now automated, with real-time threat detection and prevention.

The SonicWall Comprehensive Gateway Security Suite (CGSS) keeps your network safe from viruses, intrusions, botnets, spyware, Trojans, and worms, as well as other malicious attacks.

Comprehensive Content Filtering

You can control user access to any inappropriate, unproductive and/or any potentially illegal - or any otherwise unwanted - web content and websites with customizable Content Filtering Profiles.

Around The Clock Protection

Even before threats are identified, the SonicWall Security Appliances and the CGSS applications are automatically updated with the new profiles and signatures for the most recent global threats. Armed with these daily updates, and ensuring you have the most current protection, SonicWall stops new attacks before they can enter your network.

SONICWALL TZ350

Features and Specifications

Firewall and Security Features Include:

- Stateful Packet Inspection
- Reassembly-free Deep Packet Inspection
- DDoS Attack Protection
- Capture Advanced Threat Protection
- Intrusion Prevention
- Global Geo-IP Filtering and Blocking
- Botnet Filtering and Blocking
- Stream-based Malware Scanning
- Gateway Anti-Virus
- Gateway Anti-Spyware
- Bi-Direction Inspection
- Application Identification and Control
- Data Leakage Prevention
- Traffic Visualization and Analytics
- User Activity Reports
- Application/Bandwidth/Threat Reports
- HTTP/HTTPS Web Content Filtering
- URL Filtering and Keyword Blocking
- Policy-based Filtering (Inclusion/Exclusion)
- Secure SD-WAN VPN
- IPSec VPN for Site-to-Site Connectivity
- SSL VPN for IPSec Client Remote Access
- VPN Mobile Connect Clients (iOS, Android)
- **And So Much More!**

Firewall Inspection Throughput
1.0 Gbps

Application Inspection Throughput
600 Mbps

Intrusion Prevention Throughput
400 Mbps

Threat Prevention Throughput
335 Mbps

Ethernet Ports
5 x 1 Gigabit Ethernet

USB Ports - Cellular Hotspot
1 USB (5G/4G/LTE Capable)

SonicWall TZ350 Provides Superior Threat Prevention and Performance!

Integrated Threat Prevention

Gateway Security You Can Actually Afford!
