

APPLE ENVIRONMENT MANAGEMENT

What Apple Users Have Been Missing:

Device Management and Security as Robust as Provided to Windows Users

A remarkably simple service that still provides comprehensive protection for your workflow. Ultra-efficient management for Mac computers with integrated antivirus protection helps keep you working without interruption. We work diligently in the background to provide the support you require to get the big projects done.

- **Security** protocols you can trust to help protect from ransomware and zero-day attacks
- **Technicians** that understand Apple culture and language
- **Support** for hybrid Apple/Windows workplaces

Here's how we do it—comprehensive care for your Apple environment

Our Mac Management model is continuous and proactive. That means we work to prevent problems before they start and we're always available to help you if issues arise. Our technicians have the knowledge and experience to manage all your Apple devices.

- **MacBooks**
- **Apple TVs**
- **iMacs**
- **iPads**
- **Mac mini**
- **iPhones**
- **Mac Pro**
- **Apple displays**
